Dear Roy,

Newcastle University: Short Training Courses

As you may know the School of Civil Engineering and Geosciences at Newcastle University is keen to offer study opportunities for those in full time employment. It has developed a portfolio of short CPD courses specifically designed to match the training requirements and work commitments of Civil Engineering, Geomatics and Geoscience professionals.

I enclose details of some of the courses running in the next 12 months, perhaps you could pass these to those within your organisation who may be interested or indeed contractors that you work with.

We are currently exploring with local authorities, government agencies, consultancies and industry how best to meet the training needs of their employees. If you would like to contribute to this debate please email ceg.cpd@ncl.ac.uk.

The School has a proven track record of developing and delivering bespoke short courses and has been awarded funding to develop several new courses over the last year. We would be very interested in collaborating with you to develop a short course to meet the training requirements of your workforce.

For further information please refer to the website at www.ceg.ncl.ac.uk/cpd or contact me at ceg.cpd@ncl.ac.uk.

Regards,

Alison Bird
Professional Development Team Leader
